STOP PRESS... Needing time, Musrum accepted the offer of the year 1489 from an itinerant pedlar. This gave him the opportunity to construct the North American Continent.

Whilst engaged on this monumental work, he was glimpsed by the Portuguese cartographer Irãneo Alvarez who sketched a tentative map of him. Large unexplored areas were left blank.

Maps of Musrum's handiwork were already circulating clandestinely in Spain early in 1491. They were remarkably accurate except that the unknown cartographer insisted on colouring all the dragons blue.

And more goodies where that came from in "MUSRUM" by Eric Thacker & Anthony Earnshaw, published by Jonathan Cape.
